Ref: **Safety Recall Notification – 1st Class Mail**

Dear Crusader Engine Owner:

This letter is to inform you that a possible safety related condition is present in your Crusader engine. This condition involves the fuel system, which could, under certain circumstances, cause a **fire and/or explosion** resulting in **personal injury or death**. Although there have been no reported cases of **fire or explosion**, in the interest of your safety, Crusader strongly recommends that the boat not be used until the necessary modifications are made to eliminate the possible unsafe condition. The procedure requires an inspection of the fuel line connections. No parts replacement is necessary.

Please contact your selling, or servicing, dealer as soon as possible so he may arrange for this condition to be corrected. The procedure is simple and should be completed within a few minutes. This repair can be made at your dealer's location at no cost to you for labor. If your selling or servicing dealer has any questions regarding this, please have them contact Crusader Warranty Department.

We believe this safety recall is necessary to insure you have the safest and most trouble-free boating experience possible.

If you have any questions regarding this matter or your Crusader engine(s), please contact me at 1-888-527-8799.

At Crusader, your safety and satisfaction is our primary goal.

Sincerely,

Debbie McCall
